EXPERIENCE

TESCO, Data Analyst **Welwyn, UK | Sep 2025 – Present**

- Generated ~£400K in quarterly savings and faster sell-through by building a tool that identifies slow-selling and overstock for clearance
- Enabled senior leadership to optimise inventory allocation and reduce exposure to delisted and underperforming stock across £15M of Clipstrip and In-Queue products, by identifying and tracking those products and turning the data into actionable insights
- Reduced server load and eliminated duplicate processing by consolidating multiple Excel reports into a single Tableau dashboard on one data cube, after identifying redundancies in the reporting suite and presenting a consolidation plan to senior executives

IMPERIAL COLLEGE LONDON, Research Assistant in Finance Department **London, UK | March 2025 – July 2025**

- Built the evidence base for faculty research on interest rate risk across insurance companies by analysing their business models, product offerings, and risk exposure
- Quantified the impact of interest rate fluctuations on life insurance product portfolios over 10 years by collecting and analysing market data on portfolios and industry trends
- Contributed to research on how financial intermediaries respond to interest rate risk by delivering structured reports with insights

BLACKMONT CONSULTING, Consultant (Part Time) **London, UK | Feb 2025 – June 2025**

- Conducted market research to identify high-potential startups and nonprofit organizations for strategic partnership
- Optimized operations of a food catering service provider, reduced wastage by 5% through improved inventory management and demand forecasting

CAPGEMINI, Senior Analyst **Bangalore, India | Aug 2022 – Jul 2024**

- Led a team of 5 members to complete the Blue Yonder functional bootcamp and achieved the Blue Yonder Analyst certificate; Enhanced team's understanding of business flow, leading to improved decision-making and operational efficiency
- Collaborated cross-functionally with the third-party logistics team to setup the Warehouse Management Operating System for client
- Spearheaded independent workflow automation initiatives that reduced manual work by 60%; Saved 2 hours per analyst per day

PROJECTS AND CERTIFICATIONS

Lean Six Sigma Green Belt Certification (View Certificate**)** **Remote |Feb 2026**

AI-Driven Outreach Automation at RINGFIN (Website) **London |July 2025 – Aug 2025**

- Designed a Python and AI-based system that scaled prospecting capacity by 5x (150 to 750 clients/week) and utilized Clay.ai to build targeted lead pipelines, increasing client response rates by 20% through personalized workflows

Winner of ClearRoute x Le Mans 24h Hackathon 2025 (Blog) **London |June 2025**

- Built an LLM-powered rule-checking tool for Le Mans racing events, automating violation detection using Gemini Flash and achieving 100% accuracy on test cases during a hackathon

ESG Data & Outreach Automation at GCX (Website) **London |May 2025 – June 2025**

- Automated client outreach using Python to increase engagement efficiency by 3x. Collaborated with clients to design data-driven ESG solutions, enhancing transparency in carbon offsetting and aligning reporting with CSRD standards
